### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 4, 2005 has been entered.

### **Response to Arguments**

2. Applicant's arguments with respect to claims 1-13, 16, 18, 21-24, and 29 have been considered but are moot in view of the new ground(s) of rejection.

### **Claim Rejections - 35 USC § 102**

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 4-13, 16, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Herz et al "Herz" (U.S. Patent No. 5,78,257).

As per claims 1, 4-9, 11-13, 16, 18, Herz discloses System and method for scheduling broadcast of and access to video programs and other data using customer profiles. In so doing, Herz discloses propagating, via a forward application transport channel (FATC), a plurality of video streams representing respective pages of an interactive program guide (IPG), each IPG

Art Unit: 3623

page depicting programming associated with a respective pair of channel groups and time slots (col. 10, lines 6-20 and col. 24 line 56 through col. 25 line 6), polling the plurality of terminals for trend data (col. 6, line 56 through col. 7 line 5; and col. 41, lines 42-56), receiving via a back channel, subscriber selections associated with at least one IPG page (col. 6 line 56 through col. 7 line 5 and col. 43, lines 3-12), determining trend data associated with accumulated subscriber selection, and adapting at least one IPG page in response to said determined trend data (col. 45. lines 34-55).

As per claim 10, Herz further discloses wherein the subscriber selections include a selection for a particular filter icon from among a plurality of filter icons provided in a user interface presented at a set top terminal (col. 29, lines 31-51)

### **Claim Rejections - 35 USC § 103**

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-3, 21-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herz et al "Herz" (US Patent No. 5,758,527) in view of Hendricks et al "Hendricks" (US Patent No. 5,659,350).

Art Unit: 3623

As per claims 2-3, 21-24, Herz does not explicitly disclose the concept of stamping each event with a time of occurrence for the event. Hendricks in the same field of endeavor discloses the concept of stamping an event with a date and time (col. 29, lines 34-36). It would have been obvious to a person of ordinary skill in the art to modify the disclosures of Herz to include stamping an event with a date and time as evidenced by Hendricks in order to allow for the organizing and packaging of television programs for transmission in a television delivery system.
